

Integrated management of soil health

Overview of non chemical soil
management practices

- Overview
- Crop rotation
- Soil systems in Florida
- Managing microbial communities
- Vineyard and Orchard systems
- Use of amendments in compliance with water regulations

Soil fumigation alternatives

- Fallow and Covercrops
- High rates of Compost- Foodweb
- Biological control organisms
- Integrated systems- Orchards and Vineyards
- Other hybrid systems

Organic Production

- 1. Strawberry
- 2. Leafy vegetables
- 3. Perennial crops

Is Organic Sustainable?

Covercrop

Lettuce Production

Sclerotinia sclerotiorum and *minor*

Sclerotinia Incidence By Fumigant
